

Team 43

Project Title: MicroCART

Date: 09/28/2021

Members:

Brandon Cortez

Reid Schneyer

Colton Glick

Ellissa Peterson

Ryan Hunt

Carter Irlmeier

Zachary Eisele

What we've accomplished in the past week/what we've been researching

Brandon Cortez - Joined collaboration tools, completed requirement assignments

Reid Schneyer - Joined collaboration tools, completed requirement assignments, sent a discord link to Dr. Jones, setup Fusion360 team

Colton Glick - Read Crazy flie documentation and started researching software stack

Ellissa Peterson - Joined collaboration tools, completed requirement assignments, cleaned up the repo, checked in with team

Ryan Hunt - Joined collaboration tools, completed requirements assignments

Carter Irlmeier - Joined collaboration tools, completed requirement assignments

Zachary Eisele - Joined collaboration tools, completed requirement assignments

What we're planning to do in the coming week

Brandon Cortez - Configure gitlab kanban board

Reid Schneyer - Define requirements for base station

Colton Glick - Setup basic software control for manual control of the crazy flie. Organize git repository

Ellissa Peterson -

Ryan Hunt - Look into crazyflie source code and start a google slide explaining how it works and start to look into esp8266 wifi card.

Carter Irlmeier -

Zachary Eisele -

Issues we had in the previous week

Brandon Cortez -

Reid Schneyer - Jones is slow at responding to discord messages

Colton Glick - Busy with other courses and exams

Ellissa Peterson -

Ryan Hunt -

Carter Irlmeier -

Zachary Eisele -
